

Exceedance at Quantile Level  $q = 0.1$ . Proportion of observations that fell BELOW the respective predicted quantile values

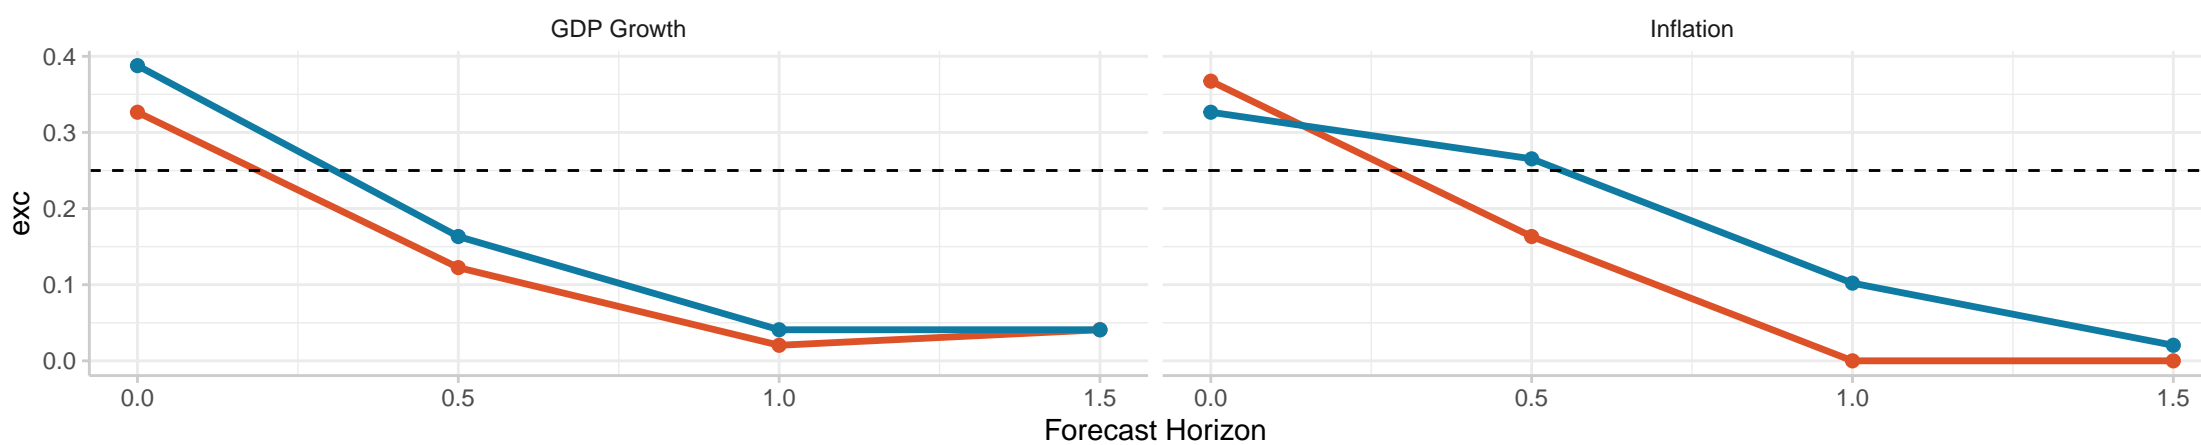

II

Exceedance at Quantile Level  $q = 0.25$ . Proportion of observations that fell BELOW the respective predicted quantile values

III

Exceedance at Quantile Level  $q = 0.75$ . Proportion of observations that fell ABOVE the respective predicted quantile values

IV

Exceedance at Quantile Level  $q = 0.9$ . Proportion of observations that fell ABOVE the respective predicted quantile values
