

Length of Central Intervals

Rike

2023-09-08

```
fcdat <- data.table::fread(here("quantile_forecasts", "quantile_forecasts.csv"))
```

Investigate width of intervals

In 0.79 of cases, the 50% prediction interval is longer for the absolute error method. In 0.86 of cases, the 80% prediction interval is longer for the absolute error method.
